Reviews

Cytochromes of archaeal electron transfer chains
M. Lübben (Germany) 1

Cyclic photophosphorylation and electron transport
D.S. Bendall and R.S. Manasse (UK) 23

Regular Papers

Study on the energy transfer processes in phycobilisomes from blue-green algae by the use of stochastic simulation approach
J. Zhao, J. Zhu and L. Jiang (China) 39

The involvement of NADP(H) binding and release in energy transduction by proton-translocating nicotinamide nucleotide transhydrogenase from *Escherichia coli*
T. Bizouarn, R.L. Grimley, N.P.J. Cotton, S.N. Stilwell, M. Hutton and J.B. Jackson (UK) 49

A Stepanov relation analysis of steady-state absorption and fluorescence spectra in the isolated D1/D2/cytochrome *b*-559 complex
G. Zucchelli, F.M. Garlaschi, R. Croce, R. Bassi and R.C. Jennings (Italy) 59

Characterization of the interaction of NADH with proton pumping *E. coli* transhydrogenase reconstituted in the absence and in the presence of bacteriorhodopsin
X. Hu, J.-W. Zhang, A. Persson and J. Rydström (Sweden) 64

The electron transport system of the facultative phototroph *Rhodoferax fermentans*. I. A functional, thermodynamic and spectroscopic study of the respiratory chain of dark- and light-grown cells
A. Hochkoeppler, G. Moschettini and D. Zannoni (Italy) 73

The electron transport system of the facultative phototroph *Rhodoferax fermentans*. II. Flash-induced oxidation of membrane-bound cytochromes *c*
A. Hochkoeppler, D. Zannoni and G. Venturoli (Italy) 81

Persisting in vitro motility of actin filaments at nanomolar ATP concentrations after ATP pretreatment
M.S.Z. Kellermayer, T.R. Hinds and G.H. Pollack (USA) 89

Sodium ion dependence of inhibition of the Na^+-translocating F_1F_0-ATPase from *Acetobacterium woodii*. Probing the site(s) involved in ion transport
M. Spruth, J. Reidlinger and V. Müller (Germany) 96

Analysis of the inhibitory non-catalytic ADP binding site on mitochondrial F_1, using NAP_3-$2N_3$ADP as probe. Effects of the modification on ATPase and ITPase activity
C.M. Edel, A.F. Hartog and J.A. Berden (The Netherlands) 103

Photosystem I from *Synechococcus elongatus*: preparation and crystallization of monomers with varying subunit compositions
P. Jekow, P. Fromme, H.T. Witt and W. Saenger (Germany) 115

Enzyme turnover is essential for deactivation of F_0F_1-ATPase in plant mitochondria
B.V. Chernyak, C. Sigalat, P. Diolez and F. Haraux (France, Russian Federation) 121

Review

Fast reactions of cytochrome oxidase
Ó. Einarsdóttir (USA) 129

Regular Papers

A model of antimycin A binding based on structure–activity studies of synthetic antimycin A analogues
H. Miyoshi, N. Tokutake, Y. Imaeda, T. Akagi and H. Iwamura (Japan) 149

Formation and decay of monodehydroascorbate radicals in illuminated thylakoids as determined by EPR spectroscopy
S. Grace, R. Pace and T. Wydrzynski (USA, Australia) 155

Effects of in vivo CO_2-depletion on electron transport and photoinhibition in the green algae, *Chlamydobotrys stellata* and *Chlamydomonas reinhardtii*
S. Demeter, T. Janda, L. Kovács, D. Mende and W. Wiessner (Hungary, Germany) 166

Primary structure and properties of the inhibitory protein of the mitochondrial ATPase (H^+-ATP synthase) from potato

K.E. Polgreen, J. Featherstone, A.C. Willis and D.A. Harris (UK) 175

Molecular structure of the 8.0 kDa subunit of cytochrome-*c* reductase from potato and its $\Delta\Psi$-dependent import into isolated mitochondria
H.-P. Braun and U.K. Schmitz (Germany) 181

Mitochondrial bioenergetics is affected by the herbicide paraquat
C.M. Palmeira, A.J. Moreno and V.M.C. Madeira (Portugal) 187

On the determination of redox midpoint potential of the primary quinone electron acceptor, Q_A, in Photosystem II
A. Krieger, A.W. Rutherford and G.N. Johnson (France) 193

A change in the midpoint potential of the quinone Q_A in Photosystem II associated with photoactivation of oxygen evolution
G.N. Johnson, A.W. Rutherford and A. Krieger (France) 202

The kinetics of photophosphorylation at clamped ΔpH indicate a random order of substrate binding
G. Kothen, O. Schwarz and H. Strotmann (Germany) 208

Vibrational coherence and relaxation dynamics in the primary donor state of the mutant reaction center of *Rhodobacter capsulatus*: Theoretical analysis of pump-probe stimulated emission
X.Z. Gu, M. Hayashi, S. Suzuki and S.H. Lin (USA, Taiwan, Republic of China) 215

F_1-ATPase α-subunit made up from two fragments (1–395, 396–503) is stabilized by ATP and complexes containing it obey altered kinetics
M. Miyauchi, K. Tozawa and M. Yoshida (Japan) 225

Functional expression of the ENA1(PMR2)-ATPase of *Saccharomyces cerevisiae* in *Schizosaccharomyces pombe*
M.A. Bañuelos, F.J. Quintero and A. Rodríguez-Navarro (Spain) 233

Characteristic changes of function and structure of Photosystem II during strong-light photoinhibition under aerobic conditions
T.-a. Ono, T. Noguchi and Y. Nakajima (Japan) 239

Is monoamine oxidase activity in the outer mitochondrial membrane influenced by the mitochondrial respiratory state?
A.B. Wojtczak, D. Brdiczka and L. Wojtczak (Poland, Germany) 249

Control theory of group transfer pathways
B.N. Kholodenko and H.V. Westerhoff (Russia, The Netherlands) 256

How to reveal various aspects of regulation in group-transfer pathways
B.N. Kholodenko and H.V. Westerhoff (Russia, The Netherlands) 275

Lipid peroxidation in tobacco leaves treated with the elicitor cryptogein: evaluation by high-temperature thermoluminescence emission and chlorophyll fluorescence
V.M. Stallaert, J.-M. Ducruet, E. Tavernier and J.-P. Blein (France) 290

Differential effects of formate in single and double mutants of D_1 in *Synechocystis sp.* PCC 6714
C. Vernotte, J.-M. Briantais, C. Astier and Govindjee (France, USA) 296

Review

The respiratory chain of alkaliphilic bacteria
D.B. Hicks and T.A. Krulwich (USA) 303

Regular Papers

Proportional activation coefficients during stimulation of oxidative phosphorylation by lactate and pyruvate or by vasopressin
B. Korzeniewski, M.-E. Harper and M.D. Brand (UK, Poland) 315

Pyrophosphate and H^+-pyrophosphatase maintain the vacuolar proton gradient in metabolic inhibitor-treated *Acer pseudoplatanus* cells
F. Macrì, M. Zancani, E. Petrussa, P. Dell'Antone and A. Vianello (Italy) 323

Spatial and electrogenic properties of superoxide-producing cytochrome *b*-559 incorporated into liposomes
V. Koshkin (Israel) 329

Bradhyrhizobium japonicum hydrogen-ubiquinone oxidoreductase activity: quinone specificity, inhibition by quinone analogs, and evidence for separate sites of electron acceptor reactivity
D.M. Ferber, B. Moy and R.J. Maier (USA) 334

Purification of three catalase isozymes from facultatively alkaliphilic *Bacillus firmus* OF4
D.B. Hicks (USA) 347

The trinuclear iron-sulfur cluster S3 in *Bacillus subtilis* succinate:menaquinone reductase; effects of a mutation in the putative cluster ligation motif on enzyme activity and EPR properties
C. Hägerhäll, V. Sled', L. Hederstedt and T. Ohnishi (USA, Sweden) 356

A metabolite of carcinogenic 2-acetylaminofluorene, 2-nitrosofluorene, induces redox cycling in mitochondria
P.-C. Klöhn, H. Massalha and H.-G. Neumann (Germany) 363

Low-temperature absorption and site-selected fluorescence of the light-harvesting antenna of *Rhodopseudomonas viridis*. Evidence for heterogeneity

R. Monshouwer, R.W. Visschers, F. Van Mourik, A. Freiberg and R. Van Grondelle (The Netherlands, Estonia) 373

Changes in secondary structure and flavin microenvironment between *Azotobacter vinelandii* lipoamide dehydrogenase and several deletion mutants from circular dichroism
A.J.W.G. Visser, W.J.H. Van Berkel and A. De Kok (The Netherlands) 381

Short Sequence-Papers

cDNA sequence of subunit VIII of ubiquinol–cytochrome-*c* oxidoreductase from *Schizosaccharomyces pombe*
H. Boumans, J.A. Berden and L.A. Grivell (The Netherlands) 386

The genomic organization of the gene encoding a nitrate-inducible ferredoxin-NADP$^+$ oxidoreductase from rice roots
H. Aoki, K. Tanaka and S. Ida (Japan) 389

The Na^+-translocating ATPase of *Acetobacterium woodii* is a F_1F_0-type enzyme as deduced from the primary structure of its β, γ and ϵ subunits
A. Forster, R. Daniel and V. Müller (Germany) 393

Cumulative Contents, Vol. 1229 399
